k. Description of Request: The licensee proposes to amend its exemption to replace the current turbine/generator which has completed its functional life cycle, and as part of ongoing maintenance, is scheduled for replacement in 2022. To remove the existing turbine/generator and install the new one, certain portions of the powerhouse building would need to be demolished and reconstructed to fit the new turbine/generator

arrangement, including a replacement draft tube. As such, the proposed amendment would require the temporary installation of a cofferdam at the downstream toe of the dam to encompass and isolate the draft tube and tailrace. The licensee would remove ledge and rock from the existing tailrace to allow the installation of the replacement draft tube and to improve hydraulic performance of existing turbine flows.
